

FITTING INSTRUCTIONS for...

- BMW F650GS - twin cylinder ('08-'12)
- BMW F800GS ('08-'12)
- BMW R1200GS (up to '12)
- BMW R1200GS Adventure (up to '13)
- BMW HP2 Megamoto ('07-'09)
- TRIUMPH Tiger 1050 Sport ('13 on)

Fitting Procedure shown for the LEFT side (repeat for right side with applicable parts)

Loosely assemble clamp to the handlebar with applicable parts (see diagram for your model motorbike). Attach the handguard backbone with applicable parts to the handlebar end and also to the clamp.

Note: The preferred backbone position is horizontal when viewed from the side.
Tighten all bolts in the following order (8) or (10) or (Original OEM bolt on Tiger), then (12), then (4 and 5).
Use recommended torque specifications over page.

Fitting Tips:

It may be necessary to move the brake and clutch controls toward the handlebar end by a few millimetres to achieve a correct fit. If the clamp frame (2 & 3) makes contact with the tank at full steering lock, it may be necessary to rotate the handlebar up (forward) slightly to allow adequate clearance.

Recommended Torque Settings	
M6	10 Nm (7.4 lbf ft)
M8	28 Nm (20.7 lbf ft)
M12 (item 6)	21Nm (15.5 lbf ft)

CAUTION:

Installation of the handguard is safety-relevant work and can be complicated. We recommend the installation be performed by a motorcycle service technician. Rideworx accepts no liability for damages caused by improper mounting. All screws, bolts and nuts, including all replacement hardware provided by Rideworx, should be tightened to the torque specified in the table. After the first 50km of riding check all screws, bolts and nuts are tightened to the correct torque. We recommend a medium strength liquid thread lock product on all fasteners.

WARNING:

Check operation of all handlebar controls, specifically the throttle, front brake, kill switch and clutch to ensure they are operating correctly and are in accordance with the OEM specifications. Do not ride the motorcycle if any controls are not operating correctly or if rear view mirror vision is obscured. Check periodically that all bolts are tight.

Disclaimer:

A failure to follow these fitting instructions could cause serious injury, death or property damage. These handguards are intended solely for use with motorcycles/ATV/snowmobiles/scooters that have not been modified. They are not designed to prevent injury or death while riding or in an accident or crash. The user must ensure that all controls are free of the handguards every time that they ride. By installing and/or using this product you acknowledge that you accept these terms and have followed the fitting instructions.
